Freshwater Fishes of North America

Volume 1: Petromyzontidae to Catostomidae

edited by Melvin L. Warren, Jr., and Brooks M. Burr

illustrated by Joseph R. Tomelleri

Certain to stand among the reference books of choice for anyone interested in the continent's aquatic ecosystems, *Freshwater Fishes of North America* covers the ecology, morphology, reproduction, distribution, behavior, taxonomy, conservation, and fossil record of each North American fish family.

Volume 1 (of three) covers the following North American families of fishes: Petromyzontidae (Lampreys), Dasyatidae (Whiptail Stingrays), Acipenseridae (Sturgeons), Polyodontidae (Paddlefishes), Lepisosteidae (Gars), Amiidae (Bowfins), Hiodontidae (Mooneyes), Anguillidae (Freshwater Eels), Engraulidae (Anchovies), Cyprinidae (Carp and Minnows), and Catostomidae (Suckers)

The encyclopedic review of each fish family is accompanied by color photographs, maps, and original artwork created by noted fish illustrator Joseph R. Tomelleri. The result is a rich textual and visual experience.

Widely anticipated, this monumental reference is the result of decades of analysis and synthesis by leading fish experts from a variety of universities, research laboratories, museums, and aquariums.

Melvin L. Warren, Jr., is a research biologist and team leader of the Aquatic and Terrestrial Fauna Team at the Center for Bottomland Hardwoods Research, Southern Research Station, USDA Forest Service. **Brooks M. Burr** is a professor and curator of fishes in the Department of Zoology at Southern Illinois University. **Joseph R. Tomelleri's** illustrations have appeared in more than 350 publications, including books, magazines, advertisements, newspapers, and identification guides.
